CURRICULUM VITAE

Name	Moussa BOUCIF		: 
Position	Project Manager		
Candidate Information	Nationality	Algeria	
	Date of Birth	August 4 th 1967	
	Languages	Arabic, English, French	
	Marital Status	Married	
	Total Years of Experience	31	
	Gulf Experience	Yes	
Educational Qualifications			
Date Certified	Qualification and Institution	Country	
2002	Post Graduate degree in Project Management, National School of Public Works Engineering, Kouba	Algeria	
1991	BSc in Civil Engineering, National School of Public Works Engineering, Kouba	Algeria	
Membership of Internationally Recognized Organizations			
- National Association of Civil Engineers, Algeria (L'Association Nationale Algérienne des Ingénieurs en Construction)			
Key Skills and Summary of Experience			
<ul style="list-style-type: none"> ▪ PMO-Project Management ▪ Construction Management ▪ Team Management ▪ Highway (Design & Construction) ▪ Infrastructure (Design & Construction) ▪ Tunnels & Culverts (Design & Construction) ▪ Procurement & Tendering ▪ Claims and Final Accounts ▪ FIDIC Contract Management ▪ Geotechnical Design & Supervision ▪ Environment, Health & Safety ▪ Quality Control and Assurance 			
<p>Well experienced in Project Management/Supervision Consultant role that included various aspects of planning, organizing, staffing, executing, and governing various infrastructure projects. Experienced to work as representative of Government as well as Consultant. Skilled in developing the standard construction methodologies to maximize the productivity and minimize the margin of error.</p> <p>Supervised challenging international transport and infrastructure projects in an optimal and timely manner. Experienced in design and managing projects up to 698 Million US Dollars and leading technical teams of 50-100 resources. Acquired strong leadership in management of teams and technical skills in multinational environments.</p> <p>Proven track record for an extensive range of project types working to strict timelines and budgets and is very competent in environment, health, safety and risk management.</p> <p>Good experience in assessment of project reports, reporting on overall project progress to the Client and providing them the granular insight needed for effective decision making on various aspects of the Engineering Projects.</p>			

EMPLOYMENT RECORD & EXPERIENCE

2019 - 2022	Botek Bosphorus Corporation Engineering Consultancy, Tanzania
Client	TANROAD (Tanzanian Roads Authority)
Position	Resident Engineer
Project-1	Project Management Services for the Construction Supervision of the BRT (Bus Rapid Transit) of Dar Es Salam Lot-2, 23km (Ref. FIDIC Conditions of Contracts-2010)
Project Value - USD	\$122 Million
Responsibilities	<ul style="list-style-type: none"> • Coordination with different stakeholders of the project, leading meetings. • Managing the project team; Assessing design works, plans, ensuring proper layout of road networks, risk plan, HSE plan, quality plan and execution supervision as per approved design. • Monitoring of the overall project budget, throughout all phases of the project. • Supervision team management (Civil-Bridge-Material-Geotechnical-Electrical-Contract Engineers, Site Material Inspectors, Site Inspectors, Surveyors, Quantity Surveyors, HSE Officers, Document Controller). • Reviewing construction drawings, PQP, Program of work, material submittals, equipment, Contractor's staff. • Ensuring the progress of the quality work within the approved budget. • Technical coordination of the various types of works in order to ensure their efficient execution and timely completion within the budget. • Implementation of control procedures and management of interfaces with the various project elements. • Coordinating the utilities works and expropriation operation. • Certifying the accomplished works and payment certificates • Approval of omission / addition of works and variation orders • Giving recommendations to TANROAD for the approval of project documentation, plans, project progress, status and payment certificates • Review of claims (if any) and recommending the Client for course of actions.
2016 - 2018	Botek & Partners Engineering Consultancy, Oman
Client	Ministry of Transport and Communications, Oman
Position	Resident Engineer
Project-1	Construction Supervision of the BATINAH Expressway Package 5 (Ref. FIDIC Conditions of Contracts-1987)
Project Value - USD	315 million Euro (\$380 Millions)
Responsibilities	<ul style="list-style-type: none"> • Managing the project team; Assessing design works, plans, ensuring proper layout of road networks, risk plan, HSE plan, quality plan and execution supervision as per approved design. • Managing supervision of work with insurance of quality in time and budget. • Technical coordination of the various types of works in order to ensure their efficient execution and timely completion.

	<ul style="list-style-type: none"> • Implementation of control procedures and management of interfaces with the various project elements. • Monitoring of the overall project budget, throughout all phases of the project. • Supervision team management (Civil-Bridge-Material-Geotechnical-Electrical-Contract Engineers, Site Material Inspectors, Site Inspectors, Surveyors, Quantity Surveyors, HSE Officers, Document Controller). • Supervision of construction project. Certificate and approval work, payment, drawing, PQP, Program of work, material, equipment, Contractor's staff. • Approval of omission / addition of works and variation orders
2015 - 2016	Driver Construction Consultancy, Oman
Client	Ministry of Transport and Communications, Oman
Position	Project Manager
Project-1	Project Management PMO for the project of construction of the Expressway of Al Batinah (FIDIC Conditions of Contracts-1987)
Project Value - USD	580 million Euro (\$678.6 Million)
Responsibilities	<ul style="list-style-type: none"> • Coordination of all the works; Project and contract management, Bill of Quantities, final accounts, and proposals. • Managing meetings, claims, payment certificates, procurements, giving recommendations for approval of materials, design change, variation, change orders. • The technical coordination of the various types of works in order to ensure their efficient execution and timely completion. • Implementation of control procedures and management of interfaces with the various project elements. • Monitoring of the overall project budget, throughout all phases of the project. • Team establishment, management of project, liaison among Client / Consultant / Contractor interfaces. • Support, monitoring and control of the project, integrate all activities, reporting. • Responsible to carry out the services in accordance with the Phases described above and shall provide services, as appropriate, during each phase.
2013 - 2015	STUDI International, Cameroon
Client	MINDHU Ministry of Development of Housing and Urban
Position	Senior Resident Engineer / Project Manager
Project-1	Construction the highway between the capital and the airport (20km 2x3 lanes) (Ref. FIDIC Conditions of Contracts-1999)
Project Value - USD	135 million Euro (\$160 Million)
Responsibilities	<ul style="list-style-type: none"> • Checking plans, drawings, and quantities for accuracy of calculations for Setting out, levelling, and surveying the site • Managing, monitoring, and interpreting the contract design documents supplied by the client

	<ul style="list-style-type: none"> • Manage the team; Elaborate the program of activities of the team; Check that the commission is carried out in accordance with the Terms of Reference; • Providing on-the-job training to the works contracts beneficiaries; • Verify and certify the interim and final statements of work; • Produce the periodic reports; Produce the final reports; • Inspect the works during the Defects Notification period and issue the related reports; • Advise the client on any issue likely to affect the financial resources. • Overseeing quality control and health and safety matters on site • Preparing reports as required
2012 - 2013	STUDI International, Ivory cost
Client	AGEROUTE Cote d'Ivoire (Road Agency of Ivory Coast State)
Position	Project Manager
Project-1	Northern Motorway Abidjan -Singrobo (140 Km) COTE D'IVOIRE
Project Value - USD	63 million Euro (\$72.5 Millions)
Responsibilities	<ul style="list-style-type: none"> • Monitoring the project from feasibility design to delivery of the project. • Construction Supervision of the Roadway, Tunnel and Bridge Structures, • Overall technical and financial administration of the contract, • Approval of the engineer/contractor's work program and sources of materials, • Approval of the detailed design and contractor's working drawings, • Construction supervision of the works, • Control and appraisal of the progress of the works, • Ordering tests of materials and of completed works, • Ensuring that environmental mitigation measures are implemented during construction. • Support the client in the tendering phase and delivery of the project. • Feasibility study of the project, establish tendering, recommendation for the contractor and engineer approval, approval for project team, • coordination for expropriation and utilities deplanement task with different authorities. • Approval for project contractor documents (Quality Control, HSE plan, procedure of work / method statements, project schedule, progress of work, payment certificates, monitoring the approved budget). • Review and recommendation for variation and claims (Time and costs)
2008 - 2012	EGIS International, Algeria
Client	Ministry of Publics Work/ National Agency of Highways
Position	Project Manager (Head of Division)
Project-1	Motorway East- West, Western Batch (359 km)
Project Value - USD	689 million Euros (\$826 Millions)

Responsibilities	<ul style="list-style-type: none"> • Checking plans, drawings, and quantities for accuracy of calculations for Setting out, levelling, and surveying the site • Managing, monitoring, and interpreting the contract design documents supplied by the client; • Control and supervision of motorway work, earthworks, Analyzes and treatment soil in place and materials for embankment, more than 15 million m³, • Analyzes and interpretation of the results of the laboratory tests (soil and concrete). • Supervision of pavement works (900 000 tons of bituminous mix). • Noncurrent bridge (Cumulated linear viaducts: 2 km), Validation and reception of the materials (in place test and in Laboratory) and equipment test Participation in the technical visits in project site with the various experts (Geotechnical, geologist (karstic cavity zone), hydraulics and environment, pavement works). • International Egis representative at the pavement commission, for the pre-commissioning of the section of Tlemcen (100 km). • Overseeing quality control and health and safety matters on site; • Preparing Weekly and Monthly Work Progress Reports.
1994 - 2008	Ministry of Public Works, Algeria
Client	Public Works Department, Algeria
Position	Project Manager
Project-1	Control work of the reinforcement of the National Road RN7(L=30 km), RN22C (L= 9km)
Project Value - USD	300 million Algerian Dinars (\$6 Million)
Responsibilities	<ul style="list-style-type: none"> • Departmental Project Manager PMO for Ministry of public Work • Management of different project from tendering to delivery including monitoring of meeting, reporting, approval of project team and quality plan and all task support to the client • Managing, monitoring, and interpreting the contract design documents supplied by the contractor/engineer; • Overseeing quality control and health and safety matters on site; • Preparing reports as required. • Monitoring progress, payment, claims. Coordination with client and different authorities for utilities replacement and expropriation, and heritage constraint.
Project-2	Road Dualization project (To be expressway) of the RN22 and RN98 (43 km)
Project Value - USD	2400 million Algerian Dinars (\$48 Million)
Responsibilities	<ul style="list-style-type: none"> • Project and scope preparation, Project design, Control and supervision of work, Team Management, Budgeting
Project-3	Supervision of maintenance of roads 300km
Project Value - USD	450 million USD
Responsibilities	<ul style="list-style-type: none"> • Project and scope preparation, Project design, Control and supervision of work, Team Management, Budgeting

Project-4	Construction of a new national road RN99 (L =5 km).
Project Value - USD	\$6.3 Million
Responsibilities	<ul style="list-style-type: none"> • Project and scope preparation, Project design, Control and supervision of work, Team Management, Budgeting
Project-5	Rehabilitation of national road RN94 (L = 10km)
Project Value - USD	\$3.5 Million
Responsibilities	<ul style="list-style-type: none"> • Responsible for the preparation of project design (pavement design, longitudinal and crosswise, corrections of dangerous bends sanitation longitudinal), base layer of crushed stone (25cm) and surface dressing
Project-6	Reinforcement of the national road RN98 (L= 6 km)
Project Value - USD	\$2.8Million
Responsibilities	Project and scope preparation, Project design, Control and supervision of work, Team Management, Budgeting
1991 - 1994	Remchi, Algeria
Project-1	Various Projects
Project Value - USD	\$2 Million
Client	Ministry of Publics Work
Position	Structural Design Engineer
Responsibilities	<ul style="list-style-type: none"> • Providing design drawing and technical specification for all Bridges, Road's junctions, and other structures • Develop structure project design criteria, design calculations, construction details, quantities and cost estimates, • Analyze survey reports, maps, drawings, blueprints, aerial photography, and other data. • Responsible for cost control on projects and quality control, • investigate design and field engineering difficulties and coordinate schedules, managing single and multi-discipline structural engineering projects and develop cost-effective design solutions, • Provide technical guidance and mentoring of project team members, • Prepare and check design drawings and specifications, • Review and check engineering work completed by others, • Oversee planning, design and construction phases of projects
Computer Skills	MS Office, MS Project, AutoCAD, SAP
